When it comes to innovative technology Majestic leads the way. The SATPOS20 is a state-of-the-art automatic Satellite antenna receiver in a fully enclosed dome. Specifically designed for Caravans and RV's for easy and quick installation, and more importantly very easy to use functions.

With a mounting foot print of 720mm and a height of 380mm this dome is the perfect size without the unsightly appearance of all the exposed mechanics found in most other brands.

For the ultimate in TV reception the Majestic Satellite system is the only choice.

When it comes to the best technology, Majestic is leading the way.
